

Space Saving

Office Mobile Storage

Go Mobile For Better Financial Returns

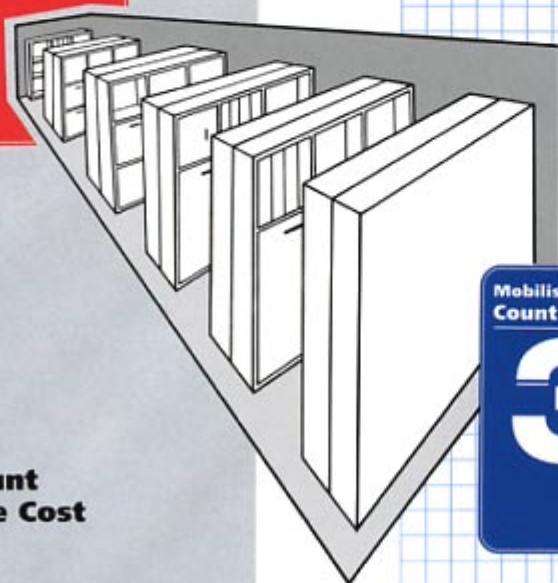

It is widely recognised that office/archival accommodation represents a major operating expenditure – more especially in prime locations – that is second only to employment costs.

With this in mind the new office mobile storage equipment has been specially designed to provide space saving benefits, with easy install and relocate characteristics which leave no trace of fixings. Additionally it can readily be expanded or adapted to suit changing needs.

In most instances the system will increase storage capacity by up to 80% or reduce space requirements by 30%, to provide a rapid return on capital expenditure.

The Accommodating System

Office Mobile can be supplied with a wide range of shelving, cabinets, drawer or filing systems. In many instances existing storage units can also be mobilised.

Simple to install with a minimum of disruption, tracks and floor can be laid on top of most existing floors permitting relocation if required without the need to uplift fixings or damage existing floor finish. Track levelling facilities aid the smooth running of units which do not have to follow any irregularities in the floor and the positive chain drive reduces the prospect of units 'slipping' under drive.

Count the Quality..

Colour Formats And Trim.

Laminated end panels are provided in a choice from standard or customer specified patterns.

Levelling is a simple operation. Attention to detail.

Three spoke or steering wheel operation can be supplied with a locking mechanism. An aid to security.

NB Systems are available in lengths up to 4 metres and loads per mobile up to 3.2 tonnes. It is the customer's responsibility to check that the floor is capable of supporting the intended loads.

Information on these loads can be provided if required.

A high level of trim is maintained throughout with a choice of decorative end panels and carpet colours available to complete a scheme sympathetic with the existing decor.

Purpose requested colour schemes can be provided to order.

A comprehensive range of carpet tiles provides customer choice for matching decor schemes.
